**WILSON LEE
PRIMARY EXAMINER**

Allowable subject matter

Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art neither discloses nor suggests the following limitation, in combination with the remaining elements disclosed in the independent claims:

- a reset driver generating a reset pulse for initializing the state of the capacitive light emission device based on the sum of the first voltage generated by the first power source and the second voltage generated by the second power source, and applying the reset pulse to the row electrode such as required by claims 1 and 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ishizuka (6,717,557) discloses a driving apparatus and driving method of an AC type plasma display panel comprising a reset driver for outputting reset pulses common to all of scan electrodes. Setoguchi et al. (6,707,436) discloses a plasma display panel comprising a step of supplying reset pulse to all X-electrodes. Kishi et al. (6,686,912) discloses a step of summing sustain pulse voltage and write voltage and then being supplied to the sustainer circuit. Kojima et al. (6,072,448)

Art Unit: 2821

discloses a plasma display device comprising a step of calculating total length of sustaining discharge periods then being added with total length of the reset periods.

The references cited above do not disclose the claimed invention.
